## Commentary

### *Types of Housing Loan (original data)<sup>4</sup>*

In May 2017, housing finance commitments for owner occupation in the ACT consisted of 83 loans for construction of dwellings (6.7 per cent of the total), 146 loans for new dwellings (11.8 per cent), and 1,012 loans for established dwellings (81.5 per cent).

Through the year to May 2017, the number of refinances decreased by 10.2 per cent to 353 loans.

### *Average Housing Loan (original data)*

Through the year to May 2017, the average new ACT housing loan for an owner occupied home increased by 4.9 per cent to \$377,900, in line with (though slightly lower than) the average of all jurisdictions (\$380,000).

<sup>1</sup> Seasonally adjusted data takes into account calendar effects so that the effects of other influences on the series may be clearly recognised.

<sup>2</sup> Housing finance for owner occupation measures secured loans made by significant lenders for the construction or purchase of newly erected dwellings, commitments for the refinancing of existing loans, and loans taken out for the purchase of established dwellings.

<sup>3</sup> Through the year (tty) is the percentage change from the same period in the previous year.

<sup>4</sup> Original data should be used with caution due to its volatility.

### First Home Buyer (original data)<sup>5</sup>

In May 2017, housing finance commitments taken out by first home buyers in the ACT numbered 187 loans, which was 11.3 per cent higher than the May 2016 level (168 loans). First home buyers represented 15.1 per cent of the total housing loans taken out in May 2017, which is 1.4 percentage points higher than its proportion in May 2016 of 13.7 per cent.

**Number of New Loans to First Home Buyers and the Average Loan Size, ACT, Original Data**

Source: ABS Cat. No. 5609.0

<sup>5</sup>First home buyers are defined as persons entering the home ownership market for the first time as owner occupiers. First time investors are not included. In 2014, it was established that some lenders were reporting only loans extended to first home buyers who had also received a First Home Owner Grant; instead of all first home buyers. The ABS and APRA worked successfully with lenders to ensure that all loans to first home buyers are reported, regardless of whether or not they received a First Home Owner Grant. As a result, from August 2016, the number of first home buyers no longer require adjustment as most lenders are reporting correctly.
