

Southside Community Centre

2nd Quarterly Energy Report – March 2014 to May 2014

Introduction

This report summarises the energy saving results to date for Southside Community Centre. The site is now 6 months into its 12 month monitoring period.

For the first 6 months since the CEEP upgrade works, the site has reduced its electricity consumption by 17% and increased its gas consumption by 47% (compared to the baseline period).

Results

Table 1: Energy savings to date (6 months)

Fuel Type	Baseline period	Current period	Saving achieved to date
Electricity	44,774 kWh	37,268 kWh	7,506 kWh
Gas	86 GJ	126 GJ	-40 GJ

Table 2: Other savings to date

Category	Saving
Estimated Greenhouse Gas Saving	5 tonnes of CO ₂ equivalent
Estimated Financial Saving	\$800

Building tenant energy saving tips

Recommendations for tenants to further improve on building energy efficiencies and increase energy cost savings:-

- Shut down office equipment and appliances when not in use, particularly overnight and on weekends.
- Switch off equipment at power source.

Equipment includes but is not limited to the following:

- Personal computers and laptops
- Multi functional devices (MFD)
- IT Server.
