

Southside Community Centre

1st Quarterly Energy Report – December 2013 to February 2014

Introduction

This report summarises the energy saving results to date for Southside Community Centre. The site is now 3 months into its 12 month monitoring period.

For the first 3 months since the CEEP upgrade works, the site has reduced its electricity consumption by 12% and increased its gas consumption by 184% (compared to the baseline period).

Results

Table 1: Energy savings to date (3 months)

Fuel Type	Baseline period	Current period	Saving achieved to date
Electricity	21,207 kWh	18,673 kWh	2,354 kWh
Gas	6 GJ	18 GJ	-12 GJ

Table 2: Other savings to date

Category	Saving
Estimated Greenhouse Gas Saving	2 tonnes of CO ₂ equivalent
Estimated Financial Saving	\$309

Building tenant energy saving tips

Recommendations for tenants to further improve on building energy efficiencies and increase energy cost savings:-

- Shut down office equipment and appliances when not in use, particularly overnight and on weekends.
- Switch off equipment at power source.

Equipment includes but is not limited to the following:

- Personal computers and laptops
- Multi functional devices (MFD)
- IT Server.
